# Preface

Children learn best when they actively explore and create. Craft activities provide wonderful opportunities for young learners to express their ideas, develop creativity, and enjoy the process of making something with their own hands. This Senior Nursery Craft Book has been thoughtfully designed to encourage imagination, creativity, and fine motor development through simple and enjoyable activities.

Craft plays an important role in early childhood learning. Through activities such as finger printing, paper pasting, colouring, vegetable printing, cotton sticking, palm printing, and other creative tasks, children explore colours, textures, and shapes while improving hand-eye coordination and concentration.

The book follows an activity-based approach where children learn through doing. Familiar materials such as leaves, ear buds, bottle caps, vegetables, paper pieces, and other craft items are used in creative ways. These activities help children connect classroom learning with everyday experiences while developing patience, confidence, and independence.

Teachers and parents play an important role in guiding and encouraging children throughout these activities. With their support, every child can experience the joy of creating something unique.

We hope this Craft Book inspires young learners to explore, imagine, and create while building a strong foundation for creativity and joyful learning.
